22/11/2022 -

Digital Folks Cooperation (Paid Internship)

22/05/2023

- Experience and extensive knowledge in Web based application using HTML, CSS, Bootstrap, JavaScript, PHP.
- Also, I Built and maintained WordPress websites for clients using custom themes and plugins.
- Developed websites for various industries, including yoga retreats, hotels, and taxi booking services.

PROJECTS

Clinical Website for Doctor

- Developed a clinical website for a doctor using HTML, CSS, JavaScript, and some CSS libraries such as AOS (Animate On Scroll) and magnific-popup (which displays images or text in a modal window).
- Implemented an online appointment scheduling system and a contact us form for patient inquiries.
- Improved the user experience through responsive design and intuitive navigation.

Weather App

- Designed and developed a weather app that uses the user's location to display the current weather status and temperature using the OpenWeatherMap API.
- Implemented functionality to display different weather icons based on the weather data fetched from the API.

EXTRA CURRICULAR ACTIVITIES

Coordinator of Robotics Event in Annual University Festival

- Organized various games such as Robo War, Robo Soccer, Robo Race, and Impulse Momentum as part of the event.
- Developed marketing strategies resulting in increased attendance and engagement.
- Demonstrated strong leadership, communication, and organizational skills throughout the planning and execution of the event.

Coordinator of Faculty Development Program (FDP)

- Organized and managed an online FDP for faculty members, handling all presentation work and responsibilities.
- Worked with subject matter experts and instructors to develop relevant and engaging content, and ensured a productive learning experience for participants.
